Greetings,
Thank you for taking a moment to read this letter and the attached resume. I worked as a product developer intern at Carfax during my last semester. I worked as Program Analyst in TalentSprint during my undergraduate college and as a software developer in CMS India, my background has prepared me to excel in this role with my management skills, communication, organizational, multi-tasking and management skills and proved myself as proficient.

- I was delighted on seeing the challenging responsibilities that this post commands, which complements my aspirations and interests. With 1.5yr of Software Engineering experience in TalentSprint and CMS, and with a pervasive knowledge in the latest computer technologies (J2EE), programming languages (C, C++, Java, Python, JavaScript, HTML, SQL, PL/SQL, jQuery) and Web technologies (jQuery, Bootstrap, Angular JS, JavaScript, Node JS, Express Js, HTML, CSS), I seem confident that with a profile like mine, your company can attain greater heights in J2EE technology.

- In CMS, I have designed and developed a web application using Express Js, Node Js, Dynamo dB. I also have a knowledge on few Amazon Web Services like Dynamo dB, S3 Buckets and IAM roles.

- In Carfax, I have worked on the Dealer Account Management System which is used by the internal reps to provide best dealer experience.

- Back in TalentSprint, I have worked as a web developer using J2EE and important web concepts. I have played a role of managing the team as we have worked as 20 members team project.

- I have implemented the admin module of the website where the company is presently using it.

I am currently pursuing my MASTER'S IN COMPUTER SCIENCE, I am currently looking forward to work in this position as it best matches my profile as I have experience, I hope I can be asset to organization, I am willing to work a flexible schedule involves either a compressed work week or flexible starting and stopping times.

Sincerely,
Sai Tejaswi Koppuravuri.
